

ALTER[®] IP SO[®]

Your **R** solution

IPTV Services and Exclusive Solutions

Our tailor-made expertise in IPTV

Our Alter Ipso solution, specialized in IPTV, aims to respond accurately and individualized to the specific needs of each of our customers. Unlike other serial IPTV solutions, our tailor-made offer involves close collaboration between you and us, the publisher. This often starts with a thorough consultation to understand the customer's preferences, requirements and exact specifications.

Our tailor-made process typically involves several steps:

1. Initial consultation:

The client discusses with Alter Ipso to express his needs, tastes, constraints and expectations.

2. Audit or specifications:

We audit precisely to ensure a perfect fit to your expectations.

3. Customized design:

Based on the information collected, the product and/or service is designed to meet the specific needs and preferences of the customer.

4. Creation:

The IPTV solution is designed and the services are executed according to the agreed specifications on the selected connected TV.

5. Revisions and Adjustments:

Revisions may be required to ensure that the product or service exactly meets the customer's expectations. Adjustments are made as required to ensure total satisfaction.

6. Delivery or completion:

Once the IPTV solution is completed and all changes have been made, it is delivered to the customer according to the agreed terms.

Our tailor-made expertise in IPTV

In conclusion, our tailor-made offers a highly personalized experience where every detail is taken into account to create a unique product or service that meets the specific needs and desires of the customer. It is this attention to detail and adaptability that distinguishes the tailor-made from the standardized solutions currently on the IPTV market.

Our commitments

Always be by your side

With our **Rsolution**, you benefit from a complete and scalable solution that combines all PMS for **Check-in and Check-out**, as well as updates to all your communication tools and multimedia TV solutions.

Simplified management through:

- The web tool at **www.rsmart.com**
- Customer service and after-sales service available on **+33(0)4 50 665 919**

To accompany you every day

Mortech accompanies you: a project manager is your privileged and dedicated contact until the commissioning of your solution.

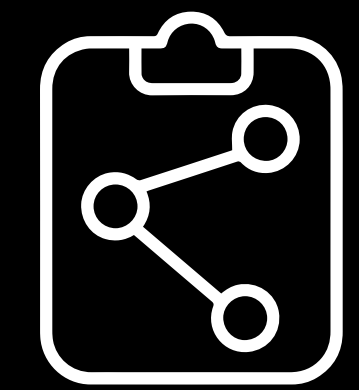

A service commitment:

- Maintenance contact **24h/24 and 7 days a week**
- A Call center **in your language**
- On-site interventions **24h/24**

Our assistance

Mortech is there to support you from the beginning to the end of your project. You can focus on your job, without having to acquire new skills: our support teams take care of everything.

Collect of technical information

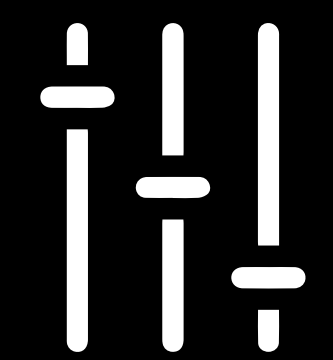

Our project manager will contact your technical teams to collect and validate your technical data and define the planning of interventions.

We confirm you the installation appointment date of your IPTV solution.

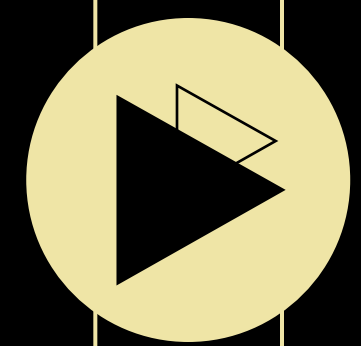

Technical intervention, installation and configuration

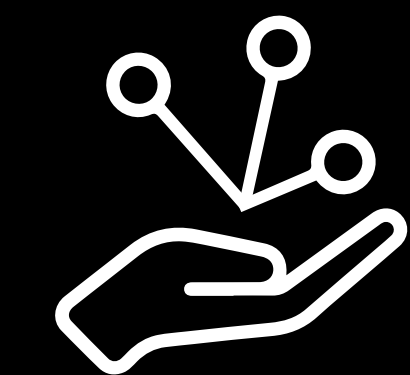

Our Alter Ipsos technicians intervene on site for the installation and configuration of services: (TV, terminals, box or tablet).

The presence of your CIO or technical team is mandatory.

Finalization and validation of the solution

You receive a commissioning notification, confirming the completion of the installation and deployment of your solution.
